

MATHEMATICS – PROGRESSION MAP

Number: Algebra

Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
EQUATIONS					
<p><i>solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \square - 9$ (copied from Addition and Subtraction)</i></p>	<p><i>recognise and use the inverse relationship between addition and subtraction and use this to check calculations and missing number problems. (copied from Addition and Subtraction)</i></p>	<p><i>solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction. (copied from Addition and Subtraction)</i></p>		<p><i>use the properties of rectangles to deduce related facts and find missing lengths and angles (copied from Geometry: Properties of Shapes)</i></p>	<p><i>express missing number problems algebraically</i></p>
		<p><i>solve problems, including missing number problems, involving multiplication and division, including integer scaling (copied from Multiplication and Division)</i></p>			
	<p><i>recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100 (copied from Addition and Subtraction)</i></p>				<p><i>find pairs of numbers that satisfy number sentences involving two unknowns</i></p>
<p><i>represent and use number bonds and related subtraction facts within 20 (copied from Addition and Subtraction)</i></p>					<p><i>enumerate all possibilities of combinations of two variables</i></p>
<p>Connected Calculations</p> <p>11 = 3 + 8 12 = 4 + 8 13 = <input type="text"/> + 8 14 = <input type="text"/> + 8</p>	<p>Connected Calculations</p> <p>Put the numbers 19, 15 and 4 in the boxes to make the number sentences correct.</p>	<p>Connected Calculations</p> <p>Put the numbers 3, 12, 36 in the boxes to make the number sentences correct.</p>	<p>Connected Calculations</p> <p>Put the numbers 7.2, 8, 0.9 in the boxes to make the number sentences correct.</p>	<p>Connected Calculations</p> <p>The number sentence below represents the angles in degrees of an isosceles triangle.</p>	<p>Connected Calculations</p> <p>p and q each stand for whole numbers. $p + q = 1000$ and p is 150 greater than q.</p>

MATHEMATICS – PROGRESSION MAP

Number: Algebra

<p>What numbers go in the boxes? Can you continue this sequence of calculations?</p>	$\square = \square - \square$ $\square = \square + \square$	$\square = \square \times \square$ $\square = \square \div \square$	$\square = \square \times \square$ $\square = \square \div \square$	<p>$A + B + C = 180$ degrees A and B are equal and are multiples of 5. Give an example of what the 3 angles could be. Write down 3 more examples</p>	<p>Work out the values of p and q.</p>
FORMULAE					
			<p><i>Perimeter can be expressed algebraically as $2(a + b)$ where a and b are the dimensions in the same unit. (Copied from NSG measurement)</i></p>		<p>use simple formulae</p>
			<p>Undoing</p> <p>If the longer length of a rectangle is 13cm and the perimeter is 36cm, what is the length of the shorter side? Explain how you got your answer.</p>	<p>Undoing</p> <p>The perimeter of a rectangular garden is between 40 and 50 metres. What could the dimensions of the garden be?</p>	<p>Undoing</p> <p>The diagram below represents two rectangular fields that are next to each other.</p> <div style="border: 1px solid black; width: 100px; height: 60px; margin: 10px auto; display: flex; justify-content: space-around; align-items: center;"> <div style="border: 1px solid black; width: 40%; height: 60%; text-align: center; padding: 5px;">Field A</div> <div style="border: 1px solid black; width: 40%; height: 60%; text-align: center; padding: 5px;">Field B</div> </div> <p>Field A is twice as long as field B but their widths are the same and are 7.6 metres. If the perimeter of the small field is 23m what is the perimeter of the entire shape containing both fields?</p>

MATHEMATICS – PROGRESSION MAP

Number: Algebra

					<p>If y stands for a number complete the table below</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 2px;">y</td> <td style="padding: 2px;">$3y$</td> <td style="padding: 2px;">$3y + 1$</td> </tr> <tr> <td style="padding: 2px;">25</td> <td style="padding: 2px;"></td> <td style="padding: 2px;"></td> </tr> <tr> <td style="padding: 2px;"></td> <td style="padding: 2px;"></td> <td style="padding: 2px;">28</td> </tr> </table> <p>What is the largest value of y if the greatest number in the table was 163?</p>	y	$3y$	$3y + 1$	25					28
y	$3y$	$3y + 1$												
25														
		28												
SEQUENCES														
<p><i>sequence events in chronological order using language such as: before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening</i> (copied from Measurement)</p>	<p><i>compare and sequence intervals of time</i> (copied from Measurement)</p> <p><i>order and arrange combinations of mathematical objects in patterns</i> (copied from Geometry: position and direction)</p>				<p>generate and describe linear number sequences</p>									
	<p>True or false? Explain The largest three digit number that can be made from the digits 2, 4 and 6 is 264. Is this true or false? Explain your thinking.</p>				<p>Generalising</p> <p>Write a formula for the 10th, 100th and nth terms of the sequences below. 4, 8, 12, 16 0.4, 0.8, 1.2, 1.6,</p>
